PART V LIBRARY COLLECTIONS

Note: Report physical units for each item, both cataloged and uncataloged, held at the end of the year. When volume data are not available, title information should be provided. <u>Physical units</u> are volumes, items or pieces. <u>Titles</u> are publications which form a separate bibliographic whole, whether issued as one or several volumes, reels, disks, slides, or parts. The term applies equally to printed materials, such as books and periodicals, and to audiovisual materials and microforms.

PART VI LIBRARY SERVICES

48. Public Service Hours for all outlets per year Include both main library, branches, bookmobiles, and Books-by-Mail Only using the following method: If the main library is open 60 hours per week count 60 hours. If you also have 3 branches open the same number of hours as the main library (regardless of whether or not all facilities are open at the same time) add 3 x 60 hrs for the branches = 180 hours for a total of 240. 240 x 52= 2,080.

Re	eport 2,080 hours.		

49. Library Visits per year

Include total number of persons entering the library for whatever purpose during the year. If an actual count of visits is unavailable, determine an annual estimate by counting visits during a typical week and multiplying the count by 52. A "typical week" is a time that is neither unusually busy or unusually slow. Avoid holiday times, vacation periods for key staff, or days when unusual events are taking place in the community or the library. Choose a week in which the library is open its regular hours. Include seven consecutive calendar days, from Sunday through Saturday (or whenever the library is usually open).

its regular hours. Include seven consecutive calendar days, from Sunday	
through Saturday (or whenever the library is usually open).	

50. Reference transactions per year

A reference transaction is an information contact which involves the knowledge, use, recommendations, interpretation, or instruction in the use of one or more information sources by a member of the library staff. It includes information and referral service. Information sources include printed and non-printed materials, machine-readable data bases (including computer-assisted instruction), catalogs and other holdings records, and, through communication or referral, other libraries and institutions and persons both inside and outside the library. The request may come in person, by phone, by fax, mail, or by electronic-mail from an adult, a young adult, or a child. When a staff member utilizes information gained from previous use of information sources to answer a question, report as a reference transaction even if the source is not consulted again during this transaction.

Note: It is essential that you do not include in-house directional transactions in the report of reference transactions. A directional transaction is an information contact which facilitates the use of the library in which the contact occurs and which does NOT involve the knowledge, use, recommendation, interpretation, or instruction in the use of any information sources other than those which describe that library, such as schedules, floor plans, handbooks, and policy statements. Examples of directional transactions include giving instruction for locating, within the library, staff, library users, or physical features, etc., and giving assistance of a non-bibliographic nature with machines.

PART VIII RESOURCE SHARING

DEFINITION:

Member of a System, Federation, or Cooperative Service

An autonomous library joined by formal or informal agreement(s) with other autonomous libraries to perform various services cooperatively, such as resource sharing, communications, etc. This does not include libraries that are part of multitype library systems, federations, or cooperative services. This does not include multiple outlet administrative entities (e.g.,libraries with branches and that have the word "system" in their legal name) if the entity does not have an agreement with another autonomous library. Note: For the purposes of this classification, networks such as OCLC and Internet are not considered systems, federations, or cooperative services. **Libraries that are members of CLAN or LORI are members of a system or cooperative service.**
